GLASS EXPANSION NEBULIZER PART NUMBERS

U-Series glass concentric, DuraMist, OpalMist, PolyCon and VeeSpray nebulizers

ARG - yy - ZZ nnn

ARG argon gas operated nebulizer

yy the argon flow in L/min eg. 07=0.7L/min

ZZ nebulizer model type:
 UC = Conikal U-Series nebulizer
 US = Slurry U-Series nebulizer
 USS = Seaspray U-Series nebulizer
 UM = MicroMist U-Series nebulizer
 CV = Ceramic VeeSpray v-groove nebulizer
 DM = DuraMist HF resistant nebulizer
 CP = PolyCon Polyimide HF resistant nebulizer
 PFA = OpalMist PFA HF resistant nebulizer

nnn aspirated uptake at nominal argon flow, in mL/min
 eg. UC2 = 2mL/min, UM04 = 0.4mL/min, CP005 = 0.05mL/min

LEARN ABOUT GLASS EXPANSION NEBULIZERS

Our glass concentric nebulizers are available in two styles – the latest U-Series and the earlier nebulizer with EzyFit sample connector. All have Glass Expansion's unique VitriCone construction.

U-Series Glass Concentric Nebulizers

The U-Series is our latest design and it has a UniFit sample connector which slides easily over the sample arm. The benefits of the U-Series nebulizer are:

- Resists blockage: The sample channel is uniform from the entry point to the tip, so there is nowhere for particulates to be trapped.
- Fast washout: Since there is nowhere for sample to be trapped, the fastest possible washout and highest sample throughput is achieved.
- Simple to use: Our proprietary UniFit connector slides easily over the sample arm and creates an excellent seal.
- Full length VitriCone construction: With the VitriCone design, the sample channel is constructed from heavy glass capillary which is machined to very high tolerances.

SeaSpray, MicroMist, Conikal and Slurry U-Series nebulizers are available to suit all common models of ICP-OES and ICP-MS. Each U-Series nebulizer is supplied with a UniFit sample connector.

U-Series nebulizers can be identified by the letter 'U' in the part number, eg. ARG-07-USS2 or ARG-1-UM04.

All glass concentric nebulizers in this catalog are U-Series nebulizers.

Nebulizer with EzyFit connector

The EzyFit is a sample connector which slides into the nebulizer sample arm. It provides lower dead volume and faster washout times than earlier designs but is not quite as effective as the newer U-Series.

The SeaSpray, MicroMist, Conikal and Slurry nebulizers are available with EzyFit connection. They can be identified by the letter "F" in the part number, eg. AR30-07-FSS2E or AR30-1-FM04E

The EzyLok argon connector

The EzyLok is the easy, safe and effective way to connect argon supply tubes to your nebulizer

Features:

- Promotes user safety
- Stiffening of argon supply tube is no longer a problem
- Eliminates bonding of argon supply tube to nebulizer side arm
- Can be used with 4mm nylon tubing or standard 6mm soft tubing

The EzyLok Kit:

The EL-1 EzyLok Kit comprises:

- 1 x EzyLok Connector for 4mm Tubing
- 1 x EzyLok 6mm hose adaptor
- 1 x Hose Clip

All nebulizers in this catalog are supplied with the EL-1 EzyLok Kit.

LC INTERFACE FOR SPECIATION MEASUREMENTS

The chemical effect of some elements varies dramatically depending on the species present. Therefore the concentration of each species needs to be determined rather than the total concentration of each element. In order to measure the concentration of different species, they must first be separated using chromatography – most commonly LC – and then detected using ICP-MS or ICP-OES.

The LC Fittings Kit, part number FT-16-8, allows quick and easy connection to any U-Series nebulizer. And the LC Fittings Kit can be configured to interface to all common LC outputs.

NEBULIZER TYPES

Nebulizer	TDS (%)	Particulates (µm)	HF	Precision	Purity	Robustness	Material
Conikal	5	75	No	High	Good	Good	Glass
SeaSpray	20	75	No	High	Good	Good	Glass
MicroMist	15	40*	No	High	Good	Good	Glass
Slurry	1	150	No	High	Good	Good	Glass
OpalMist	15	75*	Yes	High	Excellent	Good	PFA
PolyCon	5	75*	Yes	High	Good	Good	Polyimide
DuraMist	30	75*	Yes	High	Good	Good	PEEK
Ceramic VeeSpray	30	300	Yes	Moderate	Good	Excellent	Ceramic

* Varies with nebulizer uptake

NEBULIZER SELECTION GUIDE

SPRAY CHAMBERS – HIGHEST QUALITY, UNIFORMITY AND EFFECTIVENESS

Helix – The Modern Interface Between Nebulizer and Spray Chamber

Most ICP spectrometers rely on an O-Ring seal between the nebulizer and the spray chamber. This design may result in extended washout times due to dead volume around the seal. The Helix eliminates dead volume, resulting in faster washout times and higher sample throughput. Also, even the most chemically resistant O-Rings are prone to wear and tear and require regular replacement. They also tend to bond to a glass nebulizer, making the nebulizer difficult to remove. To eliminate all of these problems, Glass Expansion has developed Helix – the user friendly nebulizer/spray chamber interface.

- Faster washout times due to elimination of dead volume around the nebulizer seal
- No O-Rings to replace
- Totally inert – impervious to organic solvents and strong acids
- Smooth nebulizer insertion and removal
- Special release/lock mechanism seals the chamber
- Positive stop to ensure correct nebulizer position

Helix fittings can only be used with Glass Expansion spray chambers incorporating the Helix side arm. They cannot be used with spray chambers designed with an O-Ring seal.

Part numbers for Helix glass spray chambers can be identified by the letters HE at the end, as in 20-809-0224HE. All of the glass spray chambers in this catalog are supplied with Helix. All of the PTFE and PFA spray chambers in this catalog are supplied with a Helix. They do not have the HE suffix since they are not available without Helix.

UniFit Drain Connector

For your convenience and safety, each Glass Expansion spray chamber with standard 4mm drain tube is supplied with a UniFit connector P/N UFT-075. The UniFit connector efficiently connects a 0.75mm ID x 1.3mm OD drain tube to the spray chamber.

SPRAY CHAMBER TYPES

Spray chamber	Internal Volume, mL	Internal Baffle	HF-resistant	Precision	Purity	Material
Tracey	50	No	No	Very good	Good	Glass
Twister	50	Yes	No	Excellent	Good	Glass
Cinnabar	20	No	No	Very good	Good	Glass
Twinnabar	20	Yes	No	Very good	Good	Glass
Tracey TFE	50	No	Yes	Good	Good	Teflon
Tracey PFA44	44	No*	Yes	Good	Excellent	PFA

SPRAY CHAMBER SELECTION GUIDE

*The Cinnabar Spray Chambers also provide a faster washout

TORCHES – INNOVATIVE AND INSPIRATIONAL

D-Torch* Demountable Torch

The D-Torch is a revolutionary new demountable torch design. It provides the benefits of a fully demountable torch at a significantly lower cost. Interchangeable outer tubes made of quartz or ceramic are available. The quartz tube is ideal for most aqueous applications and, since the outer tube is usually the first to wear, you can make a significant saving by replacing just the outer tube rather than the whole torch. The ceramic outer tube is of particular benefit for the analysis of samples with high salt content or wear metals in engine oils, where quartz outer tubes often suffer from short lifetime. The ceramic outer tube has a much longer lifetime, greatly reducing interruptions and downtime due to torch failure. The D-Torch uses the same mounting system as the standard fixed torch so there is no additional cost or complexity to install it.

- Demountable outer tube – why replace the entire torch when just the outer tube wears?
- Interchangeable quartz and ceramic outer tubes.
- Much lower cost than other demountable torches.
- Interchangeable injectors for aqueous, organics, high dissolved solids or HF applications.

* The D-Torch is covered by US Patent 8,232,500 B2

Semi Demountable Torches

- Highly accurate construction
- Lower running costs than 1-piece torches

Usually comprises a quartz torch body, a torch adaptor, an injector and GazFit connectors. All these parts are replaceable, making the semi demountable torch more cost effective than the fixed quartz torch.

Essentially the design of the torch for standard analyses and HF analyses is the same, with the exception of the injector material. The torch for aqueous and organics analyses comes with a quartz injector, while the torch for HF analyses comes with an alumina injector. Hence simply interchange between quartz and alumina injectors for appropriate analyses. Several internal diameters for both quartz and alumina injectors are available.

Fixed Quartz Torches (One Piece)

- Precise quartz construction
- Wide range held in stock
- High dimensional accuracy
- Supported by Glass Expansion expertise

GazFit Connectors

Now there's a better way to connect argon tubes. GazFit connectors provide reliable attachment of argon tubes without adhesion. Available to suit torches with 4mm, 5mm, 6mm and 8mm OD side arms.

Note: GazFit connectors are only suitable for torches with tolerances of no more than $\pm 0.15\text{mm}$ on the diameter of the side arms. All Glass Expansion torches meet this specification.

RF COILS – MORE EFFICIENT ENERGY TRANSFER

Why Change Your RF Coil?

- Regular replacement of corroded coils reduces the load on the RF generating system.
- Changing corroded coils increases energy transfer, resulting in a more robust plasma and generally higher analytical line intensities.

P/N 70-900-1000G shown.

Advantages of Glass Expansion RF Coils

- High quality and consistent plating of our coils promotes extended coil life.
- Each coil is supplied on a plastic former ensuring correct dimensions and easier installation.
- Each coil is supplied in a special protective container to ensure correct dimensions are maintained, and the coil arrives corrosion free.
- Correct alignment of the RF Coil with respect to the torch body reduces devitrification of the outer tube.
- Reusable alignment tools ensure correct installation every time. Our CD with Do-it-yourself instructions saves time.

Glass Expansion Installation Kits for RF Coils

Save the cost of a service call

- Incorrect alignment of the torch in the coil will dramatically reduce torch life. The Glass Expansion Installation Kits help ensure correct alignment and maximum torch life.
- Correct alignment of the RF Coil with respect to the torch body reduces devitrification of the outer tube.
- Re-usable alignment tools are available separately to ensure correct installation of the coil every time.
- Our easy to follow Do-It-Yourself installation instructions save you time, and the cost of a service call.

All kits contain:

- An Installation Kit – Aligns coil to torch mounting bracket.
- Required Spanner/s – Designed specifically for each instrument.
- CD with Do-It-Yourself instructions.

ICP-MS CONES

Our manufacturing plant includes several CNC machines plus an electron beam welder and is the best equipped and best qualified cone machining plant in the world. We supply cones for all of the popular ICP-MS models and, to make sure you get all the support you need, we have a staff of technical experts and a fully equipped ICP-MS laboratory for testing and evaluation.

No-Risk Guarantee

As with all of our products, our cones are backed by our complete satisfaction guarantee.

Free Refurbishment

Extend the life of your platinum cones with our free refurbishment program. In many cases, a platinum cone can be refurbished multiple times and its lifetime greatly extended. As a customer service, Glass Expansion will refurbish your platinum cones free-of-charge.

Platinum Reclaim

If your platinum cone cannot be refurbished, we will provide a rebate for the value of platinum in the cone.

ConeGuard

The ConeGuard Thread Protector protects the cone thread from corrosive cleaning solutions and greatly extends cone life.

Contact us at enquiries@geicp.com to check the availability of cones and ConeGuards for your ICP-MS model.

ISOMIST

IsoMist Programmable Temperature Spray Chamber

The Ultimate Spray Chamber for ICP-MS and ICP-OES

The IsoMist Programmable Temperature Spray Chamber, provides the benefits of a temperature-controlled ICP sample introduction system in a compact, convenient package.

Peltier Effect Temperature Control

The temperature is electronically controlled using a powerful inbuilt Peltier device. You can select any temperature between -10°C and $+60^{\circ}\text{C}$ in 1°C increments to provide the optimum conditions for any application. The rapid response of the Peltier device allows a spray chamber temperature of -5°C to be reached within 15 minutes.

Versatile Computer Interface

For maximum convenience, the IsoMist can be controlled from your PC via a Bluetooth® wireless interface or a standard USB network connection. The spray chamber temperature can be monitored through a temperature versus time plot on your PC screen. And, for regulatory compliance, the temperature versus time data file can be saved with your results. If these features are not required, once the temperature has been programmed, the IsoMist can be run in stand-alone mode without a PC connection.

Reduced Oxide Interferences in ICP-MS

By introducing the sample at low temperature, the IsoMist reduces oxide levels, resulting in fewer interferences and improved detection limits.

Perfect for Volatile Organics

The temperature can be set as low as -10°C to reduce the solvent load on the plasma and allow the straightforward ICP-MS or ICP-OES analysis of even the most volatile organic solvents.

Constant Temperature Improves Stability

By holding the spray chamber at a constant temperature, the IsoMist significantly improves long-term signal stability, increasing the likelihood of calibration checks passing.

Heating Mode Enhances Sensitivity

The sensitivity for many applications is enhanced by running the spray chamber at an elevated temperature, a feature that is particularly important for samples with limited volume.

Proven Cyclonic Spray Chamber

The IsoMist incorporates the proven Twister cyclonic spray chamber, combining excellent sensitivity and precision with exceptionally fast washout. The Helix nebulizer interface has zero dead volume and provides for convenient nebulizer insertion and removal. This system is compatible with the full range of Glass Expansion nebulizers.

Completely Self-Contained Ergonomic Package

The compact design includes a rugged, low maintenance, chemically-resistant polypropylene housing. It provides a much more convenient alternative to a jacketed spray chamber with an external chiller because it does not require an external source of coolant. It is compatible with almost all ICP-MS and ICP-OES models.

Optional PFA and Quartz Spray Chambers

The IsoMist can be used with PFA or quartz spray chambers in addition to the standard glass Twister spray chamber. Please contact enquiries@geicp.com for information on a suitable PFA or quartz spray chamber for your IsoMist.

The IsoMist can also be ordered with a PFA or quartz spray chamber installed in place of the standard glass spray chamber. Simple add a "P" for PFA or a "Q" for quartz to the part number for the standard kit, eg. KT-1010P for PFA or KT-1010Q for quartz.

Ordering Information

We have established an IsoMist Kit for common ICP-OES and ICP-MS models. Each kit contains the IsoMist module, encapsulated Twister spray chamber, torch interface and mounting bracket (if required).

Please see the Product List for your ICP model to find the compatible IsoMist kit or contact enquiries@geicp.com for assistance.

TRUFLO

TruFlo Sample Monitor

Eliminates guesswork

Reduces sample repeats

Sounds out-of-range alarm

Is suitable for all ICP-OES and ICP-MS models

TruFlo Sample Monitor

TruFlo Sample Monitor 0-4mL/min [70-803-0643](tel:70-803-0643)

TruFlo Sample Monitor 0-1mL/min [70-803-0788](tel:70-803-0788)

TruFlo Sample Monitor 0-0.05mL/min [70-803-0774](tel:70-803-0774)

TruFlo Sample Monitor for HF 0-4mL/min [70-803-0890](tel:70-803-0890)

Do you ever need to repeat the analysis of a sample due to:

- A blocked nebulizer?
- Worn peristaltic pump tubing?
- Incorrect pressure of the pump tubing clamp?

With the digital display of the TruFlo Sample Monitor, you always know the actual rate of sample uptake to your nebulizer. This enhances the day-to-day reproducibility of your results and reduces the need to repeat measurements due to a blocked nebulizer, worn pump tubing or incorrect clamping of the pump tube. And the borosilicate glass sample path ensures that there is no memory effect or sample contamination. The TruFlo can even sound an alarm if the sample uptake is outside your specified limits.

The actual sample flow is shown on the TruFlo's inbuilt digital display and a graph of the flow versus time can also be displayed on your computer.

The TruFlo is normally calibrated for aqueous solutions. However, if you are running non-aqueous solutions, we can supply a TruFlo calibrated for your specific application. Simply add Part Number 70-TFCAL, TruFlo Calibration Service, to your TruFlo order.

NIAGARA CM

Niagara CM Rapid Rinse Accessory

Most ICP systems incorporate an autosampler. With these systems there is a significant delay between the time when the autosampler probe enters the sample and the time when the sample reaches the nebulizer and further time is lost as the probe moves between sample and rinse. If these delays could be eliminated, the analysis time per sample could be reduced significantly and the sample throughput increased.

This is what the Niagara CM Rapid Rinse Accessory achieves.

The Niagara CM provides all of the benefits of the original Niagara in a more compact easier-to-use design. It begins the rinsing of the nebulizer and spray chamber the instant the sample measurement is completed and continues to rinse until the next sample is ready. Thus the rinse is carried out in time that is usually wasted waiting for the sample solution to flow from the autosampler to the nebulizer. The time that is saved is around 30% for a typical analysis. This significantly reduces the cost per sample for busy laboratories such as those analyzing environmental, geochemical and oil samples.

The Niagara CM is compatible with most ICP-OES and ICP-MS spectrometers and autosamplers.

Niagara CM Rapid Rinse Accessory

[KT-1124](tel:70-803-1124)

Adjustable Mounting Bracket for Niagara CM

[70-803-1142](tel:70-803-1142)

NIAGARA PLUS CM

Niagara Plus CM

Halve your operating costs

Reduce your environmental footprint

Double your sample throughput

The Niagara Plus uses Flow Injection technology to reduce analysis time, environmental impact and operating cost:

- Lower argon consumption
- Reduced cost of consumables such as torches, cones, RF coils, pump tubing, acids, standards and chemicals
- Lower power consumption
- Reduced stress on RF system and lower maintenance cost
- Less down-time for cleaning carbon from torch when analyzing organics
- Less chemical waste to dispose of

In addition to the cost and environmental benefits, the Niagara Plus delivers a major improvement in analytical performance:

- Twice the sample throughput for a typical analysis
- Half the normal sample volume
- Automatic addition of the internal standard simplifies sample preparation
- Inert sample path reduces carryover – the sample does not contact any peristaltic pump tubing
- Constant flow of solution to the plasma maintains plasma stability and reduces stabilization times
- Compact design easily interfaces to almost all models of ICP-MS and ICP-OES

A mounting bracket is required for most ICP models. Choose from the following:

Part Number	ICP Model
70-803-0979	Agilent 7700/8800
70-803-0906	Bruker Aurora 800
21-809-3690	Spectro Arcos/Spectroblue with cyclonic spray chamber
No bracket required	Agilent Vista/700-ES Radial
No bracket required	Agilent 4100 MP-AES
No bracket required	Spectro MS
70-803-1141	All other models

The Niagara Plus requires a 1.0mm ID autosampler probe for optimum performance. Select one of the following probes:

Autosampler Probes

Teflon Encapsulated Carbon Fibre Probe 1.0mm ID (suitable for Cetac ASX-520)	70-803-0793
Teflon Encapsulated Carbon Fibre Probe 1.0mm ID (suitable for PerkinElmer S-10 or AS-93+)	70-803-0816
Teflon Encapsulated Carbon Fibre Probe 1.0mm ID (suitable for Agilent (Varian) SPS-3 or AIM-3600)	70-803-0853
Teflon Encapsulated Carbon Fibre Probe 1.0mm ID (suitable for Agilent I-AS)	60-703-0533

If your autosampler is not listed here, please contact Glass Expansion at enquiries@geicp.com.

Niagara Plus

Niagara Plus CM	KT-1118
Niagara Plus CM for HF	KT-1127
Niagara Plus CM with Pneumatic Actuator	KT-1126

ASSIST

The Assist syringe-driven sample introduction system

Assists you with faster throughput
 Assists you with improved accuracy
 Assists you with better precision

The Assist is an automated sample introduction system for ICP-OES or ICP-MS. It consists of purpose-built programmable syringe drives with an integrated valve system. The Assist delivers the highest level of accuracy, stability and sample throughput by controlling the delivery of both sample and internal standard or diluent, eliminating the inaccuracies and pulsations caused by peristaltic pumps. The Assist provides you with:

Twice the sample throughput. The rinse time, stabilization time and the time for the sample to move from the autosampler to the nebulizer are all reduced. This reduces the time for a typical analysis by at least half.

Better precision. The sample is delivered by a precisely controlled syringe, eliminating the signal pulsation problem which occurs with the usual peristaltic pump delivery system.

Better accuracy. The internal standard is delivered by a second precision syringe drive, ensuring that the ratio of internal standard to sample is accurately maintained. The fluctuations in this ratio that occur when the internal standard is delivered by peristaltic pump are eliminated, greatly improving the analytical accuracy.

Automatic dilution. The second syringe drive can also be used to deliver a diluent, enabling accurate dilution to be carried out automatically.

Reduced carryover. The sample does not contact any peristaltic pump tubing and the sample path is totally inert. This allows for a faster rinse and reduces carryover.

Low sample and internal standard usage. The volumes required are substantially reduced, resulting in lower cost of reagents and less wastage.

Flexibility in the selection of the ratio of sample to internal standard. The syringe system allows you to use sample to internal standard ratios of up to 20:1 and still get accurate correction.

Longer life of consumables. The lower sample volume and reduced analysis time mean that you save on consumables such as torches and ICP-MS cones as well as argon.

Compatibility. The Assist software is configured to operate with almost all models of ICP-MS, ICP-OES and autosampler.

Assist Packages

Assist CM Premium Package (2 syringe units)	KT-1123
Assist CM Basic Package (1 syringe unit)	KT-1129
Assist CM Oils Package (3 syringe units)	KT-1132
Assist CM Premium Package for HF	KT-1131
Assist CM Basic Package for HF	KT-1122

Configured to suit your application

The Assist is a modular system of syringe drives and switching valves and it can be configured to suit specific applications.

Premium Package. This is the most common system and is the system described above. It incorporates two syringe drives and a Niagara switching valve. It provides for the inline delivery and mixing of the sample and internal standard or diluent. P/N KT-1123

Basic Package. This system is used when inline delivery of internal standard or diluent is not required. It incorporates a single syringe drive and a Niagara switching valve. It provides all of the benefits listed above with the exception of those relating to delivery of internal standard or diluent. P/N KT-1129

Oils Package. This system is configured specifically for the analysis of wear metals in raw (undiluted) lubricating oils. It incorporates three syringe drives and a Niagara switching valve. It takes a sample of the oil, mixes it with a diluent such as kerosene and precisely delivers the diluted oil to the ICP spectrometer. It eliminates the need for manual dilutions and increases the speed of analysis. P/N KT-1132

Please contact enquiries@geicp.com to find the Assist package most suitable for your application.

OTHER ACCESSORIES

Eluo Nebulizer Cleaning Tool

Particle build-up in a nebulizer capillary and tip causes sample flow to be constricted, thereby reducing nebulizer efficiency and performance. Previously there was no simple way to effectively clean and unblock nebulizers. Now, blocked nebulizers can be safely and easily restored to optimum performance with a revolutionary cleaning instrument – the Eluo.

The Eluo is designed to efficiently deliver a cleanser through the nebulizer capillary to dislodge particle build-up and thoroughly clean the nebulizer.

Eluo Nebulizer Cleaning Tool

Eluo Nebulizer Cleaning Tool (glass concentric nebulizers) [70-ELUO](#)

Eluo Nebulizer Cleaning Tool (new OpalMist, PolyCon or DuraMist) [70-ELUO-OPD](#)

Eluo Nebulizer Cleaning Tool (old OpalMist or PolyCon) [70-ELUO-OP](#)

Inline Particle Filter

If there are particulates in your samples, there is a risk that they may get trapped in the fine channels of your sample line or within the nebulizer. The Inline Filter provides a simple and effective way to eliminate this risk. This filter is easily inserted in the sample tubing between the autosampler probe and the nebulizer. It incorporates a 120 micron filter and is suitable for use with 1/16 inch (1.6mm) OD sample tubing. Filters for use with different tubing are available on request.

The purpose-built clog-resistant design is ideal for ICP samples. Any particle build-up is easily removed by back-flushing using the Eluo Adaptor 70-803-1160. And the PEEK material is suitable for use with all of the most common ICP solutions.

Inline Particle Filter

Capricorn Argon Humidifier

The Argon Humidifier is commonly used in ICP analyses involving samples with high dissolved solids concentration. Helping to prevent salt build-up inside the sample introduction system, the Argon Humidifier allows uninterrupted and maintenance free operation. The Glass Expansion Capricorn combines ease of operation, high performance and safety.

- The rugged and durable casing enhances safety.
- The built-in pressure indicator serves as a diagnostic so you always know when the chamber is pressurized.
- An optional easy-to-use bypass toggle allows you to take the Capricorn off-line without disconnecting argon lines.
- Maximum and minimum fill marks ensure that you are always operating under optimum conditions.
- A rugged bubbling frit ensures maximum saturation of the argon.

OTHER ACCESSORIES

Trident In-Line Reagent Additions Kits

Internal standards are often used to improve stability. The internal standardization process involves the addition of a known concentration of a particular element to every sample. This can be a very time-consuming procedure. The Glass Expansion Trident Kits allow the internal standard to be automatically mixed with each sample during sample introduction, thus saving considerable sample preparation time.

Check the Trident Dilution Factor Calculator on our website to find out the sample and internal standard dilution factors for selected combinations of pump tubing.

The peristaltic pump tubing is not supplied as part of the Internal Standard Kit but can be ordered separately.

Trident Kits

Trident Internal Standard Kit	60-808-1185
Trident Internal Standard Kit for HF	60-808-1150

O-Ring Tool

With older-style spray chambers which incorporate O-Rings, it is common for the O-Rings to bond to the glass making them difficult to remove. The O-Ring Tool makes removal of O-Rings much easier.

O-Ring Removal Tool

[50-100-1636](#)

Contour Flared-end Peristaltic Pump Tubing

It can be quite difficult to insert the sample and internal standard capillary tubes into the peristaltic pump tubes. This is particularly so for the internal standard pump tube due to its small ID (usually 0.2 to 0.4mm). To facilitate this connection, Glass Expansion supplies Contour flared-end pump tubing. The flared end of this pump tubing allows larger capillary tubing to be inserted.

Ordering details for Contour Flared-end Peristaltic Pump Tubing can be found on page 55.

WindTunnel Autosampler Enclosure

The WindTunnel autosampler enclosure will protect your samples against airborne contaminants and also protect the operator against fumes and odours. And its versatile configuration makes it suitable for the most common laboratory situations:

Filtered positive pressure enclosure. When fitted with the optional fan and HEPA filter, the WindTunnel provides a positive pressure enclosure.

Vented enclosure. The addition of the optional flange, allows the fumes to be removed through a laboratory exhaust system (not supplied).

Dust cover. The WindTunnel can be used without the fan and filter to function as a convenient dust cover.

- Suitable for the Cetac 130, 260, 520 and 520HS plus PerkinElmer AS93+ and S10, and Agilent SPS-3 autosamplers
- Shatter-proof polycarbonate construction
- Easy access through front and rear roll-up doors
- Optional fan maintains positive pressure
- Optional HEPA filter
- Optional exhaust port flange
- Multiple ports for tubing and power cords

Spray Chambers

Spray Chambers – Suitable for Torch adaptor[31-808-0827](#) or [31-808-2825](#)

The following spray chambers are suitable for torch adaptors [31-808-0827](#) (equivalent PerkinElmer P/N N8120116) or [31-808-2825](#) (equivalent PerkinElmer P/N W1013266). These torch adaptors are usually used with non-DRC Elan models, or with Elan DRC models using an HF-resistant sample introduction system. They require the Elan Screw Mount CSC Adaptor, part number [21-808-0389](#), for secure mounting.

GazFit

Standard Peristaltic Pump Tubing

PVC PERISTALTIC PUMP TUBING

All tubes made from Tygon R3603/R3607 or equivalent. Supplied in packs of 12 tubes.

Special Properties:

Inexpensive all-round tubing for general laboratory applications.

Advantages:

Resistant to almost all inorganic materials.

Does not age.

Low gas permeability.

Smooth inner surface.

Limitations:

Potential leaching of plasticizers.

PVC, 2 Bridged, 152mm (152mm between tags)

SOLVA PERISTALTIC PUMP TUBING

All tubes made from Tygon 4040 or equivalent. Supplied in packs of 12 tubes.

Special Properties:

Special tubing for hydrocarbons, petroleum products and distillates.

Advantages:

Specially formulated to transport hydrocarbons, petroleum products and distillates. Ideal for gasoline, kerosene, heating oils, cutting liquids and coolants based on glycols. Low gas permeability.

Limitations:

Not recommended for strong acids and alkalies, foodstuffs, beverages and medicines. Potential leaching of plasticizers.

VITON® PERISTALTIC PUMP TUBING

All tubes made from Fluran HC F-5500-A or equivalent.

Special Properties:

Special tubing for concentrated acids and corrosive solvents.

Advantages:

High chemical resistance. Low gas permeability. Wide temperature range.

Limitations:

Limited service life.

Standard Peristaltic Pump Tubing

TYGON® MH PERISTALTIC PUMP TUBING

All tubes made from Tygon MHSL 2001.

Special Properties:

Environmental-friendly tubing especially designed for solvents.

Suitable for MIBK.

Advantages:

High chemical resistance.

Low gas permeability.

Wide temperature range.

Limitations:

Limited service life.

Contour Flared-end Peristaltic Pump Tubing

It can be quite difficult to insert the sample tubing into the peristaltic pump tubes. This is particularly so for pump tubing with a small ID. To facilitate this connection, Glass Expansion supplies Contour flared-end pump tubing. The flared end of this pump tubing allows the larger capillary tubing to be inserted into the smaller pump tubing.

Any of the pump tubing that we normally supply can be supplied with flared end. Simply add “-F” to the end of the part number (eg. 0.38-OG-F). The flared-end tubing is supplied in packs of 6.

CONTOUR FLARED END PVC PERISTALTIC PUMP TUBING

All tubes made from Tygon R3603/R3607 or equivalent. Supplied in packs of 6 tubes.

Special Properties:

Inexpensive all-round tubing for general laboratory applications.

Advantages:

Transparent.
Resistant to almost all inorganic materials.
Does not age.
Low gas permeability.
Smooth inner surface.

Limitations:

Potential leaching of plasticizers.

Contour Flared end Peristaltic Pump Tubing

CONTOUR FLARED END VITON® PERISTALTIC PUMP TUBING

All tubes made from Fluran HC F-5500-A or equivalent.

Special Properties:

Special tubing for concentrated acids and corrosive solvents.

Advantages:

High chemical resistance.

Low gas permeability.

Wide temperature range.

Limitations:

Limited service life.

Viton®, 2 Bridged, 127mm (127mm between tags)

Supplied in packs of 6 tubes

CONTOUR FLARED END TYGON® MH PERISTALTIC PUMP TUBING

All tubes made from Tygon MHS 2001.

Special Properties:

Environmental-friendly tubing especially designed for solvents. Suitable for MIBK.

Advantages:

High chemical resistance.

Low gas permeability.

Wide temperature range.

Limitations:

Limited service life.

Tygon® MH Tubing, 2 Bridged, 152mm (152mm between tags)
